CONTENTS OF VOLUME 65

NUMBER 1—10 SEPTEMBER

PAGE

The global control of a nonlinear wave equation
M. H. FARAHI, J. E. RUBIO and D. A. WILSON 1

A worst-case approach to optimal tracking control with robust performance
H. T. TOIVONEN and J. PENSAR 17

A polynomial solution to the scalar 4-block H_∞ general distance problem
A. CASAVOLA, D. FRAGOPOULOS and M. J. GRIMBLE 33

Stable sequential identification of continuous nonlinear dynamical systems by growing radial basis function networks
G. P. LIU, V. KADIRKAMANATHAN and S. A. BILLINGS 53

Optimal design of robust controllers for uncertain discrete-time systems
I. K. KONSTANTOPOULOS and P. J. ANTSAKLIS 71

A subrate weighted minimum-variance control law
A. W. TRUMAN 93

On robustified adaptive minimum-variance controller
V. Ž. FILIPOVIĆ and B. D. KOVAČEVIĆ 117

Balanced actuator and sensor placement for flexible structures
W. GAWRONSKI and K. B. LIM 131

Perspectives on the principle of matching and the method of inequalities
V. ZAKIAN 147

An improved computation of time-optimal control trajectory for robotic point-to-point motion
YAOBIN CHEN and JIAN HUANG 177

Causal and non-causal discrete-time transfer functions and their applications
R. GESSING 195

NUMBER 2—20 SEPTEMBER

Dynamical adaptive pulse-width-modulation control of DC-to-DC power converters: a backstepping approach
H. SIRA-RAMÍREZ, M. GARCÍA-ESTEBAN and A. S. I. ZINOBER 205

Appropriate realization of gain-scheduled controllers with application to wind turbine regulation
D. J. LEITH and W. E. LEITHEAD 223

On the corrective control of sequential machines
J. HAMMER 249

Iterative learning control using optimal feedback and feedforward actions
N. AMANN, D. H. OWENS and E. ROGERS 277

PAGE

Strong tracking filtering of nonlinear time-varying stochastic systems with coloured noise: application to parameter estimation and empirical robustness analysis
D. H. ZHOU and P. M. FRANK 295
A bound for the magnitude characteristics of nonlinear output frequency response functions—Part 1: Analysis and computation
S. A. BILLINGS and ZI-QIANG LANG 309
Stable on-line parameter identification algorithms for systems with non-parametric uncertainties and disturbances
FU-MING LEE, I-KONG FONG and LI-CHEN FU 329
Stability of retarded delay differential systems
S. ARUNSAWATWONG 347

NUMBER 3—OCTOBER

A bound for the magnitude characteristics of nonlinear output frequency response functions—Part 2: Practical computation of the bound for systems described by the nonlinear autoregressive model with exogenous input
S. A. BILLINGS and ZI-QIANG LANG 365
Maxwell's treatment of governors fitted with differential gears
A. T. FULLER 385
Design of variable structure controllers with continuous switching control
JIAN-XIN XU, TONG HENG LEE, MAO WANG and XING-HUO YU 409
Non-iterative computation of infimum in discrete-time H_∞-optimization and solvability conditions for the discrete-time disturbance decoupling problem
B. M. CHEN, YI GUO and ZONGLI LIN 433
Exact linearization of nonlinear systems: trajectory tracking with bounded controls and state constraints
J. L. MANCILLA AGUILAR, R. A. GARCÍA and C. E. D'ATTELLIS 455
Controller design with real parametric uncertainty
P. M. YOUNG 469
Controllability and reachability criteria for discrete time positive systems
M. E. VALCHER 511
Quantitative feedback design of uncertain multivariable control systems
CHING-CHENG CHENG, YIN-KUEI LIAO and TE-SHING WANG 537

NUMBER 4—10 NOVEMBER

Performance enhancement of wind turbine power regulation by switched linear control
D. J. LEITH and W. E. LEITHEAD 555

PAGE

Self-tuning control of a cold mill automatic gauge control system
K. DUTTON and C. N. GROVES 573
Decomposition of generalized frequency response functions for nonlinear systems using symbolic computation
S. A. BILLINGS and M. I. YUSOF 589
State-space approach to stabilizing stochastic predictive control
L. CHISCI, A. LOMBARDI, E. MOSCA and J. A. ROSSITER 619
Robust semi-global output tracking for nonlinear singularly perturbed systems
P. D. CHRISTOFIDES, A. R. TEEL and P. DAOUTIDIS 639
Nonlinear H_∞ method for Volterra systems
P. LIU and A. S. I. ZINOBER 667
Optimal parallel model solutions using the polynomial approach
R. H. MILOCCO and J. A. DE DONÁ 681
An interpolation approach to multiobjective $\mathscr{H}_\infty$ design
M. A. ROTEA and R. K. PRASANTH 699

Correspondence
Comment on 'Eigenvalue placement in a specified sector for variable structure control systems'
YONGYAN CAO and YOUXIAN SUN 721

NUMBER 5—20 NOVEMBER

Adaptive learning control of uncertain robotic systems
B. H. PARK, TAE-YONG KUC and JIN S. LEE 725
A new class of nonlinear robust adaptive controllers
YOUPING ZHANG and P. A. IOANNOU 745
An extension of the small gain theorem in $\mathscr{L}_\infty$
P. A. ANIGSTEIN and R. S. SÁNCHEZ PEÑA 771
An improved Lyapunov function for power system stability analysis
Y. J. CAO, Q. H. WU and S. J. CHENG 791
Vibrational control of a flexible beam
A. FEUER and M. LEVINE 803
On the controller and observer design of non-redundant linear mechanical systems including actuator dynamics
XIAOHANG ZHANG 827
State bounding with ellipsoidal set description of the uncertainty
D. G. MAKSAROV and J. P. NORTON 847
***J*-lossless conjugation and factorization for discrete-time systems**
W. KONGPRAWECHNON and H. KIMURA 867
A graph theoretic method for computing a formal representation of the largest controlled invariant subspace of a structured system
J. W. VAN DER WOUDE 885

PAGE

NUMBER 6—DECEMBER

Editorial
J. O'REILLY and P. C. YOUNG 899
A redundant dynamical sliding mode control scheme for an asymptotic space vehicle stabilization
H. SIRA-RAMÍREZ and H. B. SIGUERDIDJANE 901
Guaranteed level-γ $\mathscr{H}_\infty$ control in uncertain linear systems via linear matrix inequalities
POOGYEON PARK and T. KAILATH 913
Application of the minimal control synthesis algorithm to the control and synchronization of chaotic systems
D. P. STOTEN and M. DI BERNARDO 925
Robustness properties of repetitive controllers
G. HILLERSTRÖM and J. STERNBY 939
$\mathscr{H}_\infty$ output feedback control for linear discrete time-varying systems via the bounded real lemma
J. M. A. SCHERPEN and M. H. G. VERHAEGEN 963
Robust end-point optimizing feedback for nonlinear dynamic processes
P. TERWIESCH and A. ASTOLFI 995
Decentralized robust control design with insufficient number of controllers
WEN-JUNE WANG and Y. H. CHEN 1015
Balanced model reduction of symmetric composite systems
J. LAM and GUANG-HONG YANG 1031
Robust controller design for uncertain linear systems with circular pole constraints
WANG ZIDONG, TANG GUOQING and CHEN XUEMIN 1045
Subject Index 1055
Author Index 1059
